

Announcement of Live Fire Training Class

Live Fire Class B Foam Operations

This course provides practical training for mitigating spills and fires involving crude oil, ethanol and other ignitable liquids. Topics covered include: overview of common ignitable liquids; use of class B foam, with emphasis on alcohol resistant foam concentrates; foam nozzles and proportioning equipment; and determining foam needs for various scenarios. There are also hands on practical activities involving vapor suppression with finished foam, confining spills, and live fire extinguishment. During live fire evolutions, foam hand lines will be set up and employed for a leaking and burning tank truck. Full structural turnout gear, SCBA with spare cylinder, and a signed Training Authorization Letter are required for this course for all students.

Designed for: All emergency response personnel

Course Length: 12 hours

Prerequisite: Fire Fighter I or equivalent and Hazmat First Responder Operations.

Signed Training Authorization Letter required

Course number: [01-09-0084](#)

There are **TWO** sessions being conducted. **One daytime** and **One evening**.

Both classes are open to career and volunteer departments as well as Sunoco Brigade members.

Please sign up as soon as possible so we can make plans and any adjustments that may be needed.
